

Onboarding into the OpenStack Community with Git and Gerrit

<http://github.com/spotz/OpenInfraSummit>

Amy Marrich

IRC - spotz

Twitter - spotzz_

Github - spotz

Email - amy@demarco.com or
amy@redhat.com

Agenda

- Pre-Requirements Review
- Create, Triage, and Assign Documentation Bug
- Create, Commit, and Verify Patch
- Reference Materials

Pre-Requirements Review

Are Git and Gerrit Installed?

- Instructions for installing Git on MacOS, Linux and Windows:
 - <https://docs.openstack.org/contributors/common/git.html>
- Configuring Git
 - `git config --global user.name "Firstname Lastname"`
 - `git config --global user.email "your_email@youremail.com"`
- Instructions for installing Gerrit on MacOS and Linux:
 - <https://docs.openstack.org/contributors/common/setup-gerrit.html>
 - Scroll to the bottom of the page!

OpenStack Community Membership

✓ Signup at <https://www.openstack.org/join>

✓ Pick Account Type

Join The OpenStack Foundation

The OpenStack Foundation was founded in 2012. Join now as an Individual Member and help shape the future of OpenStack. It's free!

This is an exciting time for OpenStack, with the establishment of an independent, permanent legal home that can represent Stackers all over the globe for many years to come. In addition to individual members, we are also looking for corporate sponsors who believe in the mission and want to help.

THE MISSION

The OpenStack Foundation is an independent body providing shared resources to help achieve the OpenStack Mission by Protecting, Empowering, and Promoting OpenStack software and the community around it, including users, developers and the entire ecosystem.

Become a Member: Individuals & Companies can be members of the OpenStack Foundation.

Individual Member: Free

There are two levels of accounts on OpenStack.org: "Community Member" and "Foundation Member". The Foundation Member level has additional rights but also substantial responsibilities as a member of the OpenStack Foundation. Here's a quick summary of the differences:

Which type of account would you like to create?

- Community Member**
- Submit Proposed Summit Talks - Allowed
 - Vote on Proposed Summit Talks - Allowed
 - Have a Profile on OpenStack.org - Included
 - Vote on Foundation Board Member Elections - No

Community Member

- Foundation Member**
- Submit Proposed Summit Talks - Allowed
 - Vote on Proposed Summit Talks - Allowed
 - Have a Profile on OpenStack.org - Included
 - Commit code to OpenStack via Gerrit
 - Vote on Foundation Board Member Elections - Required*

Foundation Member

* Foundation Members are required to vote regularly in Board elections, or their membership can be suspended. Note that new Foundation Members must be members for 180 days before they are eligible to vote in Board Member elections. Inactive Foundation Member accounts are moved to Community Member level automatically after a period of inactivity. You may also log into your profile at any time and adjust your membership level.

Accounts Check List

Ubuntu One Login

- ✓ Go to <https://storyboard.openstack.org> or <https://launchpad.net/openstack>
- ✓ Click on Login
- ✓ Select I don't have a Ubuntu One account

The screenshot shows the Ubuntu One login page. At the top left is the Ubuntu One logo. At the top right is a link that says "Log in or Create account". Below the header is a horizontal line, and then the text "One account to log in to everything on Ubuntu". The main content area is a form titled "Ubuntu One → create account". It has a section "Please type your email:" with a text input field containing "openstacky@gmail.com". Below that are two radio buttons: "I am a new Ubuntu One user" (which is selected) and "I am a returning user". Then it says "Please tell us your full name and choose a username and password:". There are three input fields: the first contains "Stacky McStackface", the second contains "stacky", and the third is a password field with dots. Below the password field is a green progress bar and the text "Strength: good". There is another password field with dots below that. At the bottom of the form is a checkbox that is checked, with the text "I have read and accept the Ubuntu One terms of service". Below the checkbox is a red button that says "Create account". To the right of the form is a text block that says "Ubuntu One is the single account you use to log in to all services and sites related to Ubuntu." followed by "If you have an existing Ubuntu Single Sign On account, this is now called your Ubuntu One account. [Read More](#)".

Upload your SSH key for Gerrit

✓ Create and get your Public SSH Key

Create an SSH key if you do not have one or want a new one

```
ssh-keygen -C "emailaddress"  
cat ~/.ssh/id_rsa.pub
```

Accounts Check List

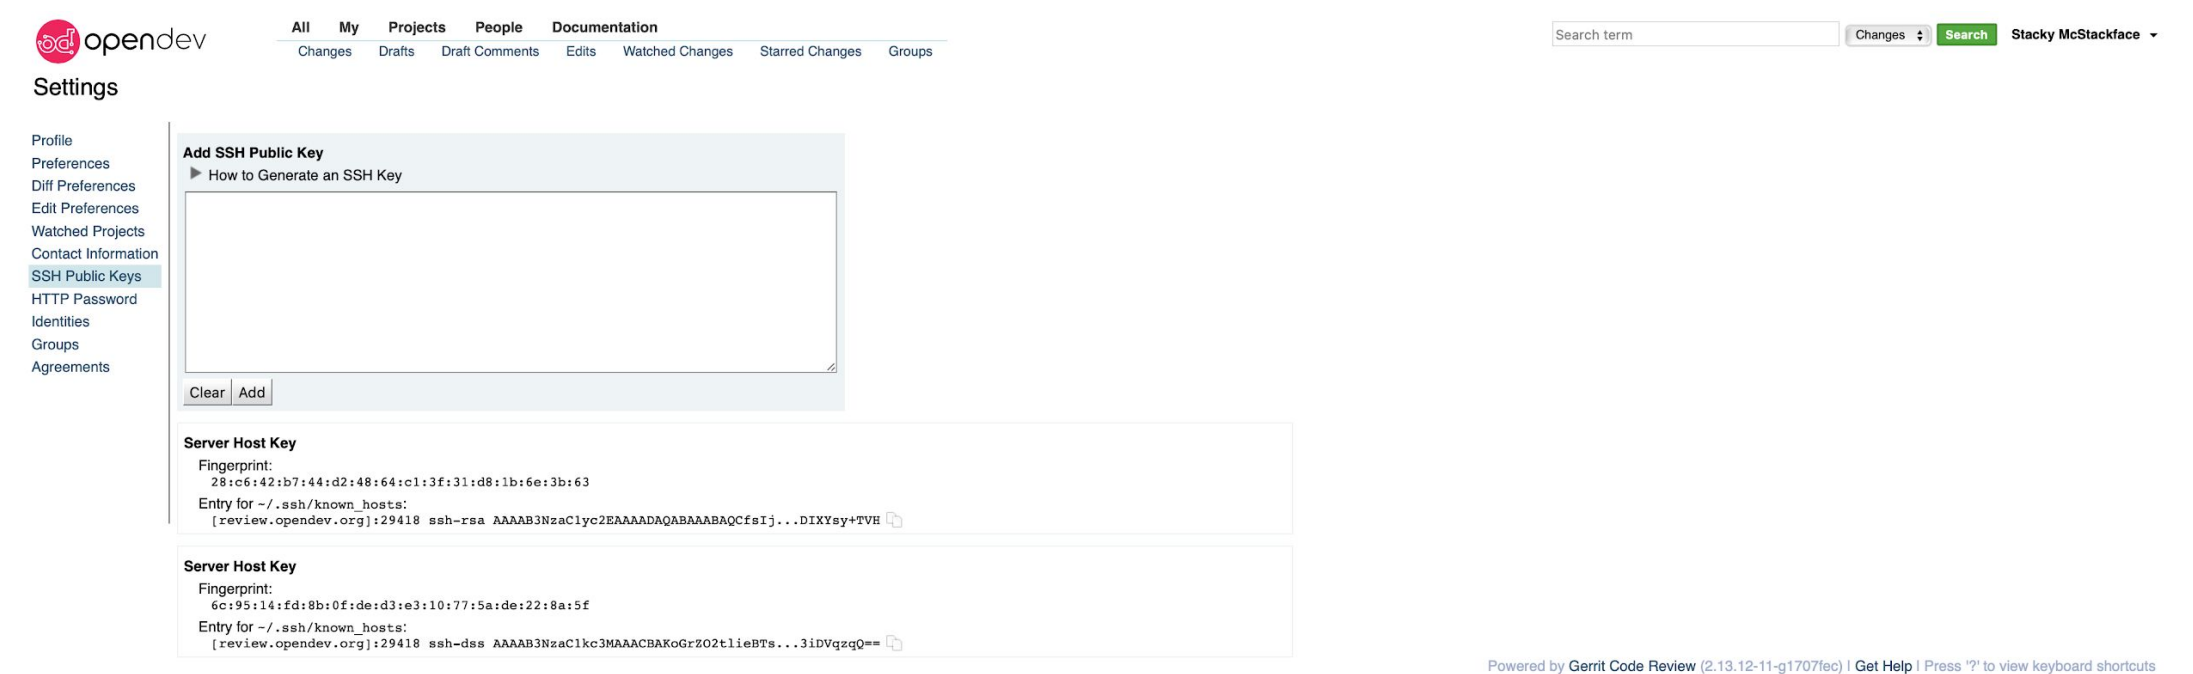

Upload your SSH key for Gerrit

- ✓ Create and get your Public SSH Key
- ✓ Go to
<https://review.opendev.org/@settings/ssh-keys>

Accounts Check List

Upload your SSH key for Gerrit

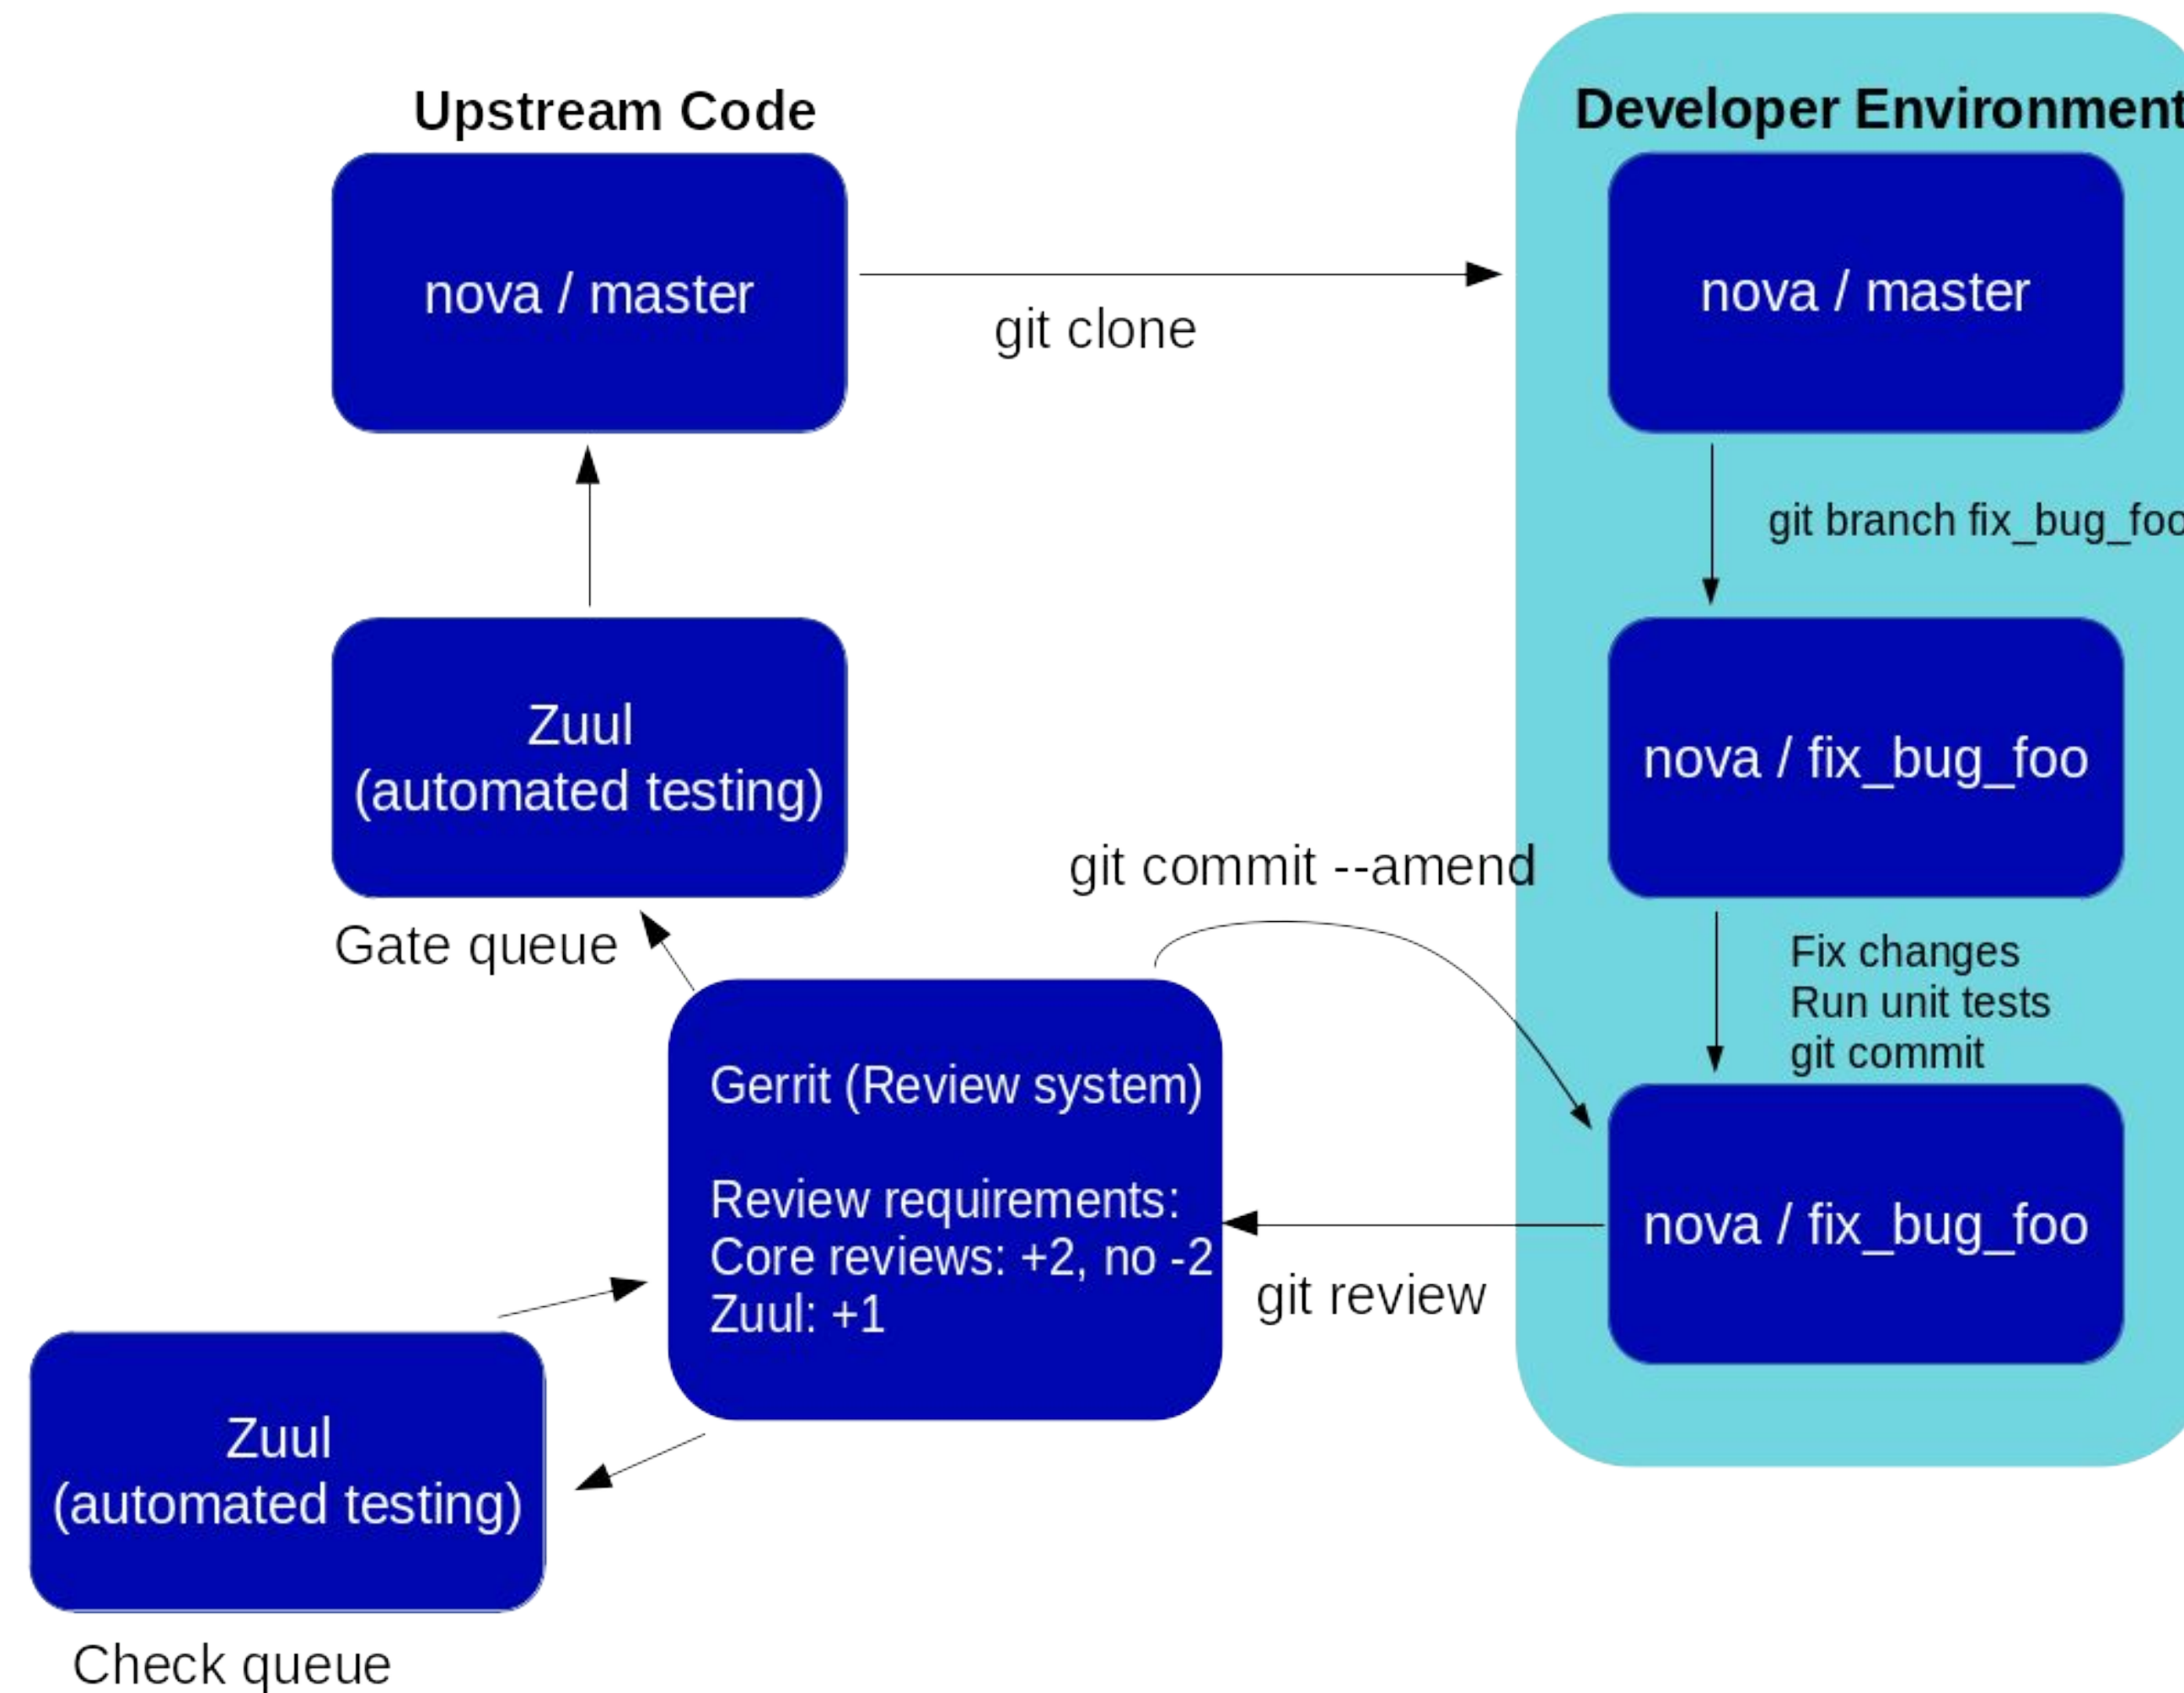

- ✓ Create and get your Public SSH Key
- ✓ Go to <https://review.opendev.org/@settings/ssh-keys>
- ✓ Login if needed and cut and paste your key

The screenshot shows the OpenDev Gerrit settings page. The left sidebar contains a menu with options: Profile, Preferences, Diff Preferences, Edit Preferences, Watched Projects, Contact Information, SSH Public Keys (highlighted), HTTP Password, Identities, Groups, and Agreements. The main content area is titled 'Add SSH Public Key' and includes a sub-section 'How to Generate an SSH Key'. Below this is a large text input field for the public key. At the bottom of the input field are 'Clear' and 'Add' buttons. Below the input field, there are two sections for 'Server Host Key'. The first section shows a fingerprint and an entry for the local host. The second section shows a fingerprint and an entry for the review.opendev.org host.

Additional Exercises

Edit a Patch

Edit File

```
$ git add filename
```

```
$ git commit -a --amend
```

```
$ git review
```

Create a Patch Dependency and Rebase

```
git pull origin master
```

(updates your local version of the master branch)

```
$ git checkout <your_branch>
```

```
$ git rebase -i master
```

```
$ git rebase --continue
```
